Explanation of Finance Charge: Your Finance Charge attributable to interest (hereinafter referred to as interest) is computed using the Average Daily Balance method.

Average Daily Balance method (Balance Subject to Interest Rate): Your interest is Average Daily Balance method (Balance Subject to Interest Rate): Your Interest is computed on all purchases and cash advances (collectively "advances") from the date each advance is posted until we receive payment in full (there is no grace period). We figure the interest on your line of credit by multiplying the daily periodic rate by the "Average Daily Balance" of your line of credit (including current transactions) and multiplying by the number of days in the billing cycle. To get the Average Daily Balance we take the beginning balance of your line of credit each day, add any new advances or debits, and subtract any payments and credits, any non-financed fees and unpaid interest. This gives us the daily balance. Then we add up all of your daily balances in the billing cycle and divide this total by the number of days in the billing cycle to get your Average Daily Balance.
